SUMMARY

Project Lead with 4+ years of experience leading cross-functional analytics and tech initiatives across telecom and infrastructure domains. Currently leads a 9-member team, specializing in Agile project coordination, stakeholder alignment, and workflow automation (including a landmark 99% reduction in processing time). Seeking a remote opportunity to leverage strong data-driven decision support and distributed team leadership to deliver high-impact platform capabilities.

SKILLS

Project Management: Project Planning & Execution, End-to-end project lifecycle delivery, Delivery Tracking & KPI Monitoring, Agile Delivery & Scrum Leadership, Stakeholder Engagement Management

Technical Skills: Microsoft Planner, Monday.com, Redmine, Microsoft Excel, JIRA, QGIS

Collaboration Tools: Microsoft Teams, SharePoint

EXPERIENCE

Lead Analyst (Project Lead), VCTI

July 2024 - Present

- Led a 9-member analytics team (7 full-time, 2 contractors), overseeing hiring, performance reviews, task allocation, and delivery of analytics outputs to meet client SLAs.
- Monitored project milestones, delivery KPIs, and resource utilization across multiple initiatives, producing structured reports and dashboards that improve delivery visibility and support data-driven decision making.
- Reduced analysis turnaround time from 2-3 days to ~30 minutes (~99% improvement) by leading the transformation of a manual CSV-based GIS workflow into an automated PostgreSQL and Python data pipeline powering the Geology Insights platform.
- Facilitated cross-functional planning across engineering, analytics, and business teams to prioritize platform enhancements and feature releases for the Geology Insights product, ensuring alignment with stakeholder needs and delivery timelines.
- Led end-to-end delivery of analytics and platform initiatives, coordinating cross-functional teams, managing project timelines and priorities, and ensuring successful execution aligned with stakeholder objectives.
- Partnered closely with cross-functional stakeholders to capture business requirements and translate them into structured analytical frameworks and data-driven insights that inform product and strategic initiatives.
- Managed project execution using Monday.com and Redmine, tracking milestones, sprint tasks, and change requests to maintain delivery visibility across teams.
- Developed Excel-based reporting dashboards, improving internal reporting efficiency by ~30% and increasing visibility into project performance metrics.

Research Analyst, VCTI

Jan 2022 – Jul 2024

- Conducted comprehensive strategic research and market intelligence analysis on global broadband infrastructure investments, supporting high-value industry insights and research deliverables.
- Supported broadband infrastructure grant and RFP proposals totaling \$145M in funding opportunities, contributing to engagements that generated ~\$5M in commission revenue for the organization through data analysis, stakeholder coordination, and submission support.
- Streamlined coordination across project teams and research workflows, significantly improving operational efficiency and project delivery timelines.
- Delivered 15+ executive-level stakeholder presentations, translating complex technical analyses into clear, actionable business insights and strategic recommendations for decision-makers.
